

PROBLEM DEFINITION :

In earlier days all the information's were maintained manually in Nav Purush Hostel, but two years ago it became computerized. The existing system was proposed when hostel was only two floors but now it is the building of four floors. So the existing system is unable to fulfill the today's requirement.

SCOPE:

My Project **"HOSTEL MANAGEGMENT SYSTEM"** can be used in various hostels. It is very Easily and efficiently manage all the record available student detailes, room detailes record reports information and all others related option of any hostels.
